

General Information for “Septic & Bio”

Treat system as per conventional rural Septics and Bio Cycles, Use Bio Safe cleaners etc.

Usage Directions: Shake Before Use then pour directly into tank or through fixtures such as toilets, Sinks etc. with enough water to ensure your tank does not go dry. Alternatively pour **ProPower** into a bucket of water and pour into the above mentioned fixtures.

Visible Particles are natural and do not reduce effectiveness

ProPower will continue cleaning as long as water remains in tank

ProPower is safe for People, Animals and plants, in case of any irritation rinse/ wash with clean water

ProPower Septic & Bio

First Time use

Septic Tank: Add 250mls per 1000 litres of tank volume (An Average House will require 1.5 litres of **ProPower** to kick start the system, *use a little more rather than a little less*)

Rainwater Tank

(Non-potable): Add 200mls per 1000 Litres

Regular Use

Septic Tank: Add 40mls per 1000 Litres per **QUARTER** (An Average Household System will require 240ml)

Rainwater Tank

(Non-Potable): Add 500ml to your tank **ANNUALLY** unless the tank has run dry then refer to First Time Use.
